UNIVERSITY

- Computer engineering
- pursuing

2022 - 2023

ASHADEEP HIGH SCHOOL 3

- S.S.C

PROJECTS

Flipkart-Clone Project

- This Flipkart Clone is a fully functional e-commerce website built using React.js, Bootstrap, and Redux. The website replicates the core functionalities of Flipkart, providing users with a seamless online shopping experience.
- Key Features:
- Product Listings – Display a wide range of products with images, descriptions, and pricing.
- Search & Filters – Users can search for products and apply category-based filters.
- Product Details Page – View detailed product information, ratings, and reviews.
- Add to Cart – Users can add/remove items to/from the shopping cart with real-time updates using Redux.
- Checkout & Payment – A smooth checkout process where users can review their cart and proceed to payment.
- User Authentication – Sign up, login, and secure user sessions (optional with Firebase/Auth).
- Redux State Management – Efficiently manages cart, user data, and product information.
